

clear_PROFIT™ on the Web

Contractor's IT in the Cloud

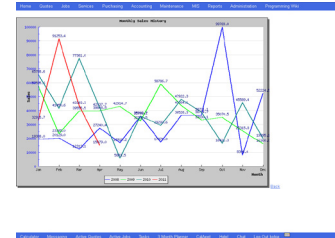

Manage your contracting or subcontracting business quickly and securely on the web. Use your PC, Mac, SmartPhone, or iPad to access your business data and processes – all you need is a browser such as Internet Explorer, Firefox, Chrome, or Safari. You can quickly perform planning, quoting, job management, accounting, and management functions. Our customers are contractors, subcontractors, and service companies in the building trades.

You will not need any other software to operate and manage your business. Our software gives highly secure internet access to your employees, customers, vendors, subcontractors, and other trading partners – all under your control. Email a quote, invoice or statement at the click of a button. Print your current income statement with the click of a button. There is nothing to install on your hardware; your information is accessed using a browser over the internet to our secure servers. The system is menu driven and simple to navigate and use.

There is a single monthly service charge for using the software system. There is no contract to sign; you can cancel service and take your data with you anytime you choose. The single subscription service charge includes full support, training and active software assistance. The system is image enabled; storing your pictures and images is included in the service. Visit www.clearprofitsoftware.com.

What are the Benefits

- Free up time for taking care of the important things - customers.
- Trading partners, such as vendors or customers, can be given login access and interact under your control and review.
- Visibility from anywhere, on any computer or mobile device.
- Recognize problems faster and measure your effectiveness in solving them.

Quotations

Responding quickly to customer requests for quotations is important. A timely and fully featured quotation establishes credibility and enhances a contractor's successful job closing rate.

- *Easy, fast data entry*
- *Integration with estimating*
- *Automated faxing and emailing*
- *Unlimited number of detail bid items*
- *Active quotes available in one click*
- *Save Time - Duplicate prior quotes*

Jobs

Successful contractors control their jobs and projects. Our tools are designed to do that. The jobs modules are designed for easy entry of key job information. Quotes and estimates can be used to build job detail. Scheduling software is available to coordinate all of the job activities. Job Cost entry allows for easy entry of job costs not captured in Accounts Payable processing.

- *Integrated with customer data*
- *Image enabled*
- *Duplicate Jobs for quick entry*
- *Default and Custom Estimating Templates*
- *Integrated with Estimating*
- *Faxing and Emailing enabled*
- *Estimating Module*
- *Project/Job Scheduling*

Purchasing

Our integrated purchasing software allows contractors to publish a Request for Quote - Vendors or Subcontractors. These trading partners can access the RFO online and quote using clear_PROFIT™. Contractors use the purchasing software to issue purchase orders (PO) and work orders (WO). A full inventory system allows you to account for and manage physical inventory.

Accounting

In clear_PROFIT™, there are complete software modules for Accounts Receivable, Accounts Payable, General Ledger, Payroll, and Banking.

A/R: *Invoicing, Cash Receipts, Adjustments, Collections, Printed Forms.*

A/P: *Invoice Entry and Edit, Recurring Invoices, Checks and Payments.*

G/L: *Journal and Expense Entry, Account Maintenance, Financials.*

P/R: *Timecard, Payroll Adjustments and Processing, Employee, Workers Comp, 1099.*

Bank: *Check Register, Transactions, Reconciliation, Maintenance.*

All jobs related information and the accounting system are integrated. Job cost information from Accounts Payable is automatically applied to jobs. A/R invoicing is directly linked to each job. Financial (G/L) information is generated by all financial functions threaded through the Jobs and Accounting software.

Maintenance

All of your important trading partner and employee data can easily be entered and updated. An important feature provides for uploading your data using spreadsheet format-import. Important deadlines – such as expiration dates for subcontractor work comp insurance expiration – are entered and you are reminded when expiration is about to occur via system generated email or texting.

Management Information System

See your business results and trends in one place. Financial information for any prior period is available at any time. See your sales and marketing data in a variety of valuable formats instantly. Owner/managers are normally the only users given access to this module.

Reports

There are numerous operating reports available to authorized users. These reports allow both summary and in-depth views of your information. You can control nearly all reports 'on the fly', making custom inquiries into your company data. The results of all reports can be 'exported' in a convenient spreadsheet (for example MS® Excel or Google Docs™ Spreadsheets) format to your desktop.

Administration

Many aspects of the system are user defined. You control forms, logos, users, reminder and deadline processing, options, and user uploads.

Training, Support, Privacy

Full training and ongoing support is included the monthly service fee. We will train you, support you and your users, and help you use the complete system efficiently. We guarantee your data privacy.

Background and Experience

MVS has been developing, marketing, training, and supporting software and systems since 1990. Our extensive experience includes commercial applications for Wholesale Distribution, Transportation and Logistics, and now, Contracting and Subcontracting with an emphasis on the building trades and services.
